

# Digital Graveyard & Memorial Management System

## Complete Functional Specification

**Document Version:** 1.0

**Date:** 02 October 2026

**Target Platforms:** Web Application + Mobile Application

**Proposed Technology:** ASP.NET Core / .NET, Blazor, .NET MAUI, SQL Server

---

## 1. Introduction

### 1.1 Purpose

The Digital Graveyard & Memorial Management System is a web and mobile-based platform designed to digitally manage the administrative, financial, operational, burial, memorial, and community activities of a graveyard.

The system will maintain official records of deceased persons and their graves while also preserving their life stories, photographs, memories, tributes, and lessons for future generations.

The system will have two complementary purposes:

1. **Graveyard Management**
  - Grave registration
  - Deceased-person registration
  - Committee management
  - Donor and fund management
  - Grave location management
  - Maintenance
  - Reports and administration
2. **Digital Memorial**
  - Deceased person's profile
  - Biography
  - Family information
  - Life journey

- Memories
  - Photographs
  - Tributes
  - Life lessons
  - QR-based grave identification
- 

## 2. Objectives

The primary objectives are:

1. Digitize all graveyard records.
  2. Maintain an accurate deceased-person registry.
  3. Maintain the physical location of every grave.
  4. Reduce dependency on paper-based registers.
  5. Maintain committee and administrative activities.
  6. Manage donations and graveyard funds transparently.
  7. Provide a searchable deceased-person database.
  8. Create a digital memorial for each deceased person.
  9. Allow authorized people to contribute memories and information.
  10. Preserve photographs, documents, and life stories.
  11. Allow visitors to access memorial information using QR codes.
  12. Provide financial and administrative reports.
  13. Maintain complete audit trails.
  14. Provide secure web and mobile access.
  15. Preserve information for future generations.
- 

## 3. Scope

The system will contain the following major modules:

1. Authentication & User Management
2. Role & Permission Management
3. Graveyard Management
4. Committee Management
5. Member Management
6. Grave/Location Management
7. Deceased Person Registration
8. Burial Management

9. Deceased Person Memorial Profile
  10. Family & Relationship Management
  11. Life Story Management
  12. Memory & Tribute Management
  13. Photo & Document Management
  14. QR Code Management
  15. Donor Management
  16. Donation Management
  17. Fund Management
  18. Income & Expense Management
  19. Accounting & Financial Reports
  20. Maintenance Management
  21. Notice & Announcement Management
  22. Event Management
  23. Feedback Management
  24. Notification Management
  25. Search
  26. Dashboard & Reporting
  27. Audit & Activity Log
  28. System Configuration
- 

## 4. User Types

The system will support different types of users.

### 4.1 Super Administrator

Responsible for complete system configuration.

Capabilities:

- Manage system settings
  - Create/manage administrators
  - Manage roles
  - Manage permissions
  - Manage graveyard
  - View all records
  - Access all reports
  - System configuration
-

## 4.2 Graveyard Administrator

Responsible for day-to-day graveyard administration.

Capabilities:

- Register deceased persons
  - Manage graves
  - Manage burial records
  - Manage members
  - Manage documents
  - Manage memorial profiles
  - Manage notices
  - Generate reports
- 

## 4.3 Committee Chairman

Capabilities:

- View dashboard
  - Approve important records
  - Approve expenses
  - Approve deceased-person records
  - Approve memorial content
  - View financial reports
  - View committee activities
- 

## 4.4 Committee Member

Capabilities depend on assigned permissions.

Examples:

- View records
- Register deceased person
- Verify information
- Review memories
- Manage events
- Participate in committee activities

---

## 4.5 Treasurer

Responsible for financial activities.

Capabilities:

- Donor management
- Donation entry
- Income
- Expense
- Voucher
- Fund management
- Financial reports

---

## 4.6 Data Entry Operator

Capabilities:

- Create deceased records
- Update permitted information
- Upload documents
- Maintain grave records

Approval may be required before information becomes public.

---

## 4.7 Registered Community User

Capabilities:

- View public memorials
  - Submit memories
  - Submit tribute
  - Submit feedback
  - Submit photographs
  - Donate
  - Manage own profile
-

## 4.8 Public Visitor

No account required for basic public information.

Can:

- Search public deceased persons
  - View public memorial profiles
  - Scan QR code
  - View grave information
  - Read approved memories
  - Read approved life stories
  - View notices
- 

# 5. Authentication & User Management

## 5.1 Registration

Users can register using:

- Name
- Mobile number
- Email
- Password
- Address
- Date of birth
- Profile photo

Optional:

- Father's name
  - Mother's name
  - Relationship with graveyard/community
- 

## 5.2 Login

Supported methods:

- Mobile/email + password
  - OTP
  - Social login may be considered later
- 

## 5.3 Password Management

- Change password
  - Forgot password
  - Password reset
  - Password policy
  - Account logout
- 

## 5.4 User Verification

Administrator may:

- Approve
  - Reject
  - Suspend
  - Block
  - Reactivate
- 

# 6. Role & Permission Management

Permissions should be granular.

Example:

DeceasedPerson.View  
DeceasedPerson.Create  
DeceasedPerson.Update  
DeceasedPerson.Delete  
DeceasedPerson.Approve

Donation.View  
Donation.Create

Donation.Update  
Donation.Approve

Expense.View  
Expense.Create  
Expense.Approve

The system must support:

- Role creation
  - Permission assignment
  - User-role assignment
  - Multiple roles per user if required
- 

## 7. Graveyard Management

### 7.1 Graveyard Profile

Maintain:

- Graveyard name
  - Address
  - Area
  - District
  - Country
  - Contact number
  - Email
  - Website
  - Establishment date
  - Description
  - Rules
  - Opening/visiting hours
  - Latitude
  - Longitude
  - Photograph
  - Logo
-

## 7.2 Multiple Graveyards

The system should preferably be designed to support multiple graveyards.

Organization

```
|  
+-- Graveyard A  
|  
+-- Graveyard B  
|  
+-- Graveyard C
```

This allows the software to become a future SaaS/product platform.

---

# 8. Committee Management

## 8.1 Committee

Maintain:

- Committee name
  - Start date
  - End date
  - Status
  - Description
- 

## 8.2 Committee Members

Maintain:

- Member
- Designation
- Joining date
- Ending date
- Responsibilities
- Status

Example:

Chairman  
Vice Chairman  
Secretary  
Joint Secretary  
Treasurer  
Member  
Advisor

---

## 8.3 Committee Meetings

Maintain:

- Meeting date
  - Meeting time
  - Location
  - Agenda
  - Participants
  - Decisions
  - Meeting minutes
  - Attachments
- 

## 8.4 Resolution

Each decision may have:

- Resolution number
  - Meeting
  - Subject
  - Description
  - Decision
  - Responsible person
  - Deadline
  - Status
-

# 9. Grave Location Management

This module maintains the physical structure of the graveyard.

## 9.1 Hierarchy

Graveyard

The exact hierarchy can be configured according to the physical graveyard.

---

## 9.2 Grave

Maintain:

- Grave ID
- Grave number
- Section
- Row
- Block
- Latitude
- Longitude
- Grave type
- Status
- Photograph
- Description

Status:

- Available
- Reserved
- Occupied
- Under Maintenance

- Inactive
- 

## 9.3 Grave Map

Future version:

- Digital map
  - Interactive sections
  - Clickable graves
  - Search and locate grave
  - Navigation to grave using mobile GPS
- 

# 10. Deceased Person Registration

This is the core module.

## 10.1 Basic Information

- Deceased ID
  - Full name
  - Bangla name
  - English name
  - Gender
  - Date of birth
  - Date of death
  - Age
  - Photograph
  - Father's name
  - Mother's name
  - Spouse
  - Occupation
  - Nationality
  - Address
- 

## 10.2 Death Information

- Date of death
  - Time of death
  - Place of death
  - Cause of death (optional/restricted)
  - Death certificate number
  - Death certificate document
- 

## 10.3 Burial Information

- Burial date
  - Burial time
  - Grave ID
  - Burial location
  - Burial reference number
  - Burial performed by
  - Responsible person
  - Additional notes
- 

## 10.4 Family Information

- Father
  - Mother
  - Spouse
  - Children
  - Siblings
  - Grandparents
  - Other relatives
- 

# 11. Deceased Person Approval Workflow

Recommended workflow:

Draft

Submitted

Verified  
↓  
Approved  
↓  
Published

Possible rejection:

Submitted  
↓  
Rejected  
↓  
Correction  
↓  
Resubmitted

---

## 12. Memorial Profile

Every deceased person will have a digital memorial profile.

Example:

-----  
IN LOVING MEMORY

Abdul Karim  
1948 - 2026

[Photograph]

A short introduction...

-----

Life Journey  
Family  
Education  
Career  
Achievements  
Memories

Photos  
Documents  
Tributes  
Life Lessons  
Grave Location

---

---

## 13. Life Story

The system should allow a structured life story.

### Sections

#### Childhood

- Birthplace
- Childhood
- Family environment

#### Education

- School
- College
- University
- Training

#### Career

- Profession
- Organizations
- Positions
- Achievements

#### Family Life

- Marriage
- Children
- Family contribution

#### Social Life

- Community involvement
- Charity
- Social activities

### **Achievements**

- Awards
- Recognition
- Contributions

### **Challenges**

- Major difficulties
  - How they were overcome
- 

## **14. Life Lessons**

This module is central to the memorial concept.

Users authorized by the family/committee can record:

**What did this person teach us?**

**What did we learn from his/her life?**

**Positive qualities**

**Mistakes and experiences**

**Right decisions**

**Wrong decisions**

**Advice for future generations**

**Final Moral/Life Lesson**

The final section could be displayed prominently:

**"What the world can learn from this life"**

Content must be subject to moderation before public publication.

---

## 15. Family Tree

The system will support family relationships.

Example:

Relationship types should be configurable.

---

## 16. Memories

Registered users can submit memories.

Each memory contains:

- Memory ID
- Deceased ID
- User
- Relationship
- Title
- Description
- Date

- Photo
- Video
- Status

Statuses:

Draft  
Submitted  
Under Review  
Approved  
Rejected  
Published

---

## 17. Tribute

Users can submit a tribute.

Examples:

- Condolence
- Personal message
- Reflection
- Appreciation

The system must provide moderation.

---

## 18. Feedback

Public users may provide:

- Feedback
- Suggestions
- Correction requests
- Information updates

Example:

"The person's birth year appears to be incorrect."

Administrator can investigate and update the official record.

---

## 19. Photo Gallery

Each deceased person can have albums.

Example:

Childhood  
Family  
Education  
Career  
Social Activities  
Awards  
Memorable Moments  
Last Journey

Each photo:

- Title
  - Description
  - Date
  - Photographer/source
  - Uploaded by
  - Approval status
- 

## 20. Document Management

Documents may include:

- Death certificate
- Birth certificate
- Awards
- Newspaper articles
- Publications
- Letters
- Other historical documents

Documents should support:

- PDF
- JPG
- PNG
- Other approved formats

Access must be controlled because some documents may be private.

---

## 21. QR Code

Each grave receives a unique QR code.

Example:

GRAVE ID: GRV-000125

DECEASED ID: DP-2026-00125

QR scan opens the public memorial page.

The system should allow:

- Generate QR
  - Download QR
  - Print QR
  - Regenerate QR
  - QR status
  - QR scan statistics
- 

## 22. Donor Management

Donor types:

- Individual
- Family
- Organization
- Anonymous

Maintain:

- Donor ID
  - Name
  - Contact
  - Address
  - Email
  - Organization
  - Tax/registration information if applicable
  - Donation history
- 

## 23. Donation Management

Each donation contains:

- Donation ID
- Donor
- Date
- Amount
- Payment method
- Purpose
- Fund
- Reference number
- Remarks

Payment methods:

- Cash
  - Bank
  - Mobile Financial Service
  - Card
  - Online Payment
- 

## 24. Donation Receipt

System should generate a printable/PDF receipt.

Contents:

## Donation Receipt

Receipt No:

Donor:

Date:

Amount:

Payment Method:

Purpose:

Thank you for your contribution.

QR verification can be added later.

---

## 25. Fund Management

Funds may be categorized.

Example:

General Fund

Development Fund

Maintenance Fund

Burial Fund

Charity Fund

Memorial Fund

Each fund should maintain:

- Opening balance
  - Income
  - Expense
  - Transfer
  - Closing balance
- 

## 26. Income Management

Income categories:

- Donation
- Membership
- Grave fee
- Service fee
- Other

Each transaction:

Income

Fund

Account

Amount

---

## 27. Expense Management

Expense categories:

- Cleaning
- Security
- Electricity
- Water
- Maintenance
- Development
- Staff
- Equipment
- Event
- Other

Workflow:

Expense Request

Approval

Payment

Voucher

↓  
Ledger

---

## 28. Financial Reports

Reports:

- Daily collection
- Daily expense
- Monthly income
- Monthly expense
- Fund statement
- Donor statement
- Donation history
- Expense statement
- Income vs expense
- Cash balance
- Bank balance
- Annual financial statement

Export:

- PDF
  - Excel
  - CSV
- 

## 29. Grave Maintenance

Maintain:

- Grave
- Maintenance date
- Work type
- Description
- Cost
- Responsible person
- Before photograph
- After photograph

- Remarks
- 

## 30. Staff/Worker Management

Optional but recommended.

Maintain:

- Worker
  - Designation
  - Contact
  - Joining date
  - Salary
  - Responsibility
  - Attendance
  - Payment history
- 

## 31. Notice Management

Administrators can publish notices.

Notice fields:

- Title
  - Description
  - Date
  - Expiry date
  - Attachment
  - Priority
  - Public/private
  - Status
- 

## 32. Event Management

Events may include:

- Graveyard cleaning
- Committee meeting
- Memorial event
- Religious/community event
- Fundraising
- Development activities

Maintain:

- Event
  - Date
  - Location
  - Organizer
  - Participants
  - Description
  - Photos
- 

## 33. Notification

Notifications can be delivered through:

- In-app
- Push notification
- SMS
- Email

Events:

- New registration
  - Approval request
  - Donation received
  - Expense approval
  - Committee meeting
  - Notice
  - Event
  - Memory approval
- 

## 34. Search

Global search should support:

Name  
Deceased ID  
Grave ID  
Father  
Mother  
Spouse  
Year of birth  
Year of death  
Occupation  
Location

Advanced filters:

Date range  
Gender  
Section  
Grave status  
Year

---

## 35. Dashboard

### Administrator Dashboard

Display:

- Total deceased
  - Total graves
  - Occupied graves
  - Available graves
  - Current fund
  - Total donations
  - Total expenses
  - Pending approvals
  - New registrations
  - Upcoming events
-

## 36. Public Dashboard

Public landing page can show:

- Total memorials
- Recent memorials
- Recently added memories
- Notices
- Events
- Donation information
- Search

Avoid exposing sensitive administrative/financial information publicly.

---

## 37. Audit Trail

Every important operation should be logged.

Maintain:

- User
- Module
- Action
- Record ID
- Old value
- New value
- Date/time
- IP address where appropriate

Examples:

Admin01  
Updated Deceased DP-000125  
Date: 02-Oct-2026 10:32

---

## 38. Data Privacy

Information should have visibility levels.

## Public

- Name
- Photograph
- Birth/death dates
- Biography
- Approved memories
- Grave location
- Approved life lessons

## Registered Users

Potentially:

- Additional family information
- Additional photographs
- Community information

## Authorized Staff

- Official documents
- Contact information
- Administrative records

## Restricted

- Sensitive documents
- Financial information
- Internal committee information
- Private family information

---

# 39. Content Moderation

User-generated content must not automatically become public.

Workflow:

User submits  
↓  
Moderation Queue  
↓  
Moderator Review  
↓  
Approve / Reject  
↓  
Public

This applies to:

- Memories
  - Tributes
  - Photos
  - Life stories
  - Comments
  - Feedback
- 

## 40. Mobile Application

### Public/User App

Main menu:

Home  
Search  
Memorials  
Scan QR  
Memories  
Tributes  
Donate  
Notices  
Events  
Profile

---

### Committee App

Additional:

Dashboard  
Deceased Registration  
Grave Management  
Approvals  
Donations  
Expenses  
Reports  
Committee  
Notifications

---

## 41. QR Scanner

Mobile app should support:

Open Scanner  
↓  
Scan Grave QR  
↓  
Identify Grave  
↓  
Open Memorial

If GPS is enabled:

View Grave  
↓  
Navigate  
↓  
Map / Directions

---

## 42. Public Memorial URL

Every deceased person should have a unique public identifier.

Example:

DP-2026-000125

Public URL:

/memorial/DP-2026-000125

The identifier should not depend on the person's name.

---

## 43. Reports

### Administrative Reports

- Deceased register
- Burial register
- Grave occupancy
- Available graves
- Grave maintenance
- Committee members
- Committee meetings

### Memorial Reports

- Memorial count
- Memories
- Tributes
- Photos
- Life stories

### Financial Reports

- Donation
- Donor
- Fund
- Income
- Expense
- Balance
- Annual statement

---

## 44. Data Export

Authorized users can export:

- Excel
- CSV
- PDF

Export must respect user permissions.

---

## 45. Backup & Recovery

The system should support:

- Automated database backup
- File/document backup
- Backup history
- Restore procedure
- Disaster recovery

Recommended:

Database

+

Uploaded Files

+

Configuration

+

Backup

must be backed up independently.

---

## 46. System Configuration

Administrators can configure:

- Organization
  - Graveyard
  - User roles
  - Permissions
  - Donation categories
  - Expense categories
  - Fund types
  - Grave types
  - Relationship types
  - Notice types
  - Document types
  - Event types
  - Notification settings
- 

## 47. Non-Functional Requirements

### Performance

- Normal page response should generally be under 2–3 seconds.
- Search should support indexed queries.
- Large photo/document operations should use asynchronous processing where appropriate.

### Security

- HTTPS
- Password hashing
- JWT/session security
- Role-based authorization
- Input validation
- SQL injection protection
- XSS protection
- CSRF protection where applicable
- Secure file upload
- File type validation
- Audit logging
- Rate limiting for public/API endpoints

## Availability

Target:

99%+ application availability

subject to infrastructure.

## Scalability

The architecture should support:

- Multiple graveyards
- Large deceased-person database
- Large photo/document repository
- Large number of public visitors
- Mobile/API clients

## Localization

Initially:

- English
- Bangla

The architecture should support additional languages later.

---

# 48. Suggested Main Navigation

## Admin Web

Dashboard

Administration

- Users
- Roles
- Permissions

- Workers
- Notices
- Events

## Reports

- Administrative
- Deceased
- Grave

└─ Memorial  
└─ Financial

Audit  
└─ Activity Log

---

## 49. Recommended Core Database Domains

At a high level, the SQL Server database can be organized around these entities:

User  
Role  
Permission  
UserRole  
RolePermission

Graveyard  
Section  
Block  
Row  
Grave

DeceasedPerson  
Burial  
DeceasedFamily  
Relationship  
FamilyMember

Memorial  
LifeStory  
LifeLesson  
Memory  
Tribute  
Photo  
PhotoAlbum  
Document

Committee  
CommitteeMember

CommitteeMeeting  
CommitteeResolution

Donor  
Donation  
Fund  
Income  
Expense  
Voucher  
Account

Maintenance  
Worker

Notice  
Event  
Feedback  
Notification

QRCode  
AuditLog  
SystemSetting

---

## 50. Important Business Rules

### BR-01

Every deceased person must have a unique system-generated Deceased ID.

### BR-02

Every grave must have a unique Grave ID.

### BR-03

A grave cannot normally be assigned to two active deceased-person records simultaneously.

### BR-04

A deceased person's official record cannot be permanently deleted without authorized permission.

Soft deletion/deactivation should be preferred.

## **BR-05**

User-submitted memories must pass moderation before publication.

## **BR-06**

Financial transactions should not be physically deleted after posting. Reversal/correction transactions should be used.

## **BR-07**

Important changes to deceased-person records must be audited.

## **BR-08**

Only authorized users may access restricted personal information.

## **BR-09**

QR codes must map to a unique grave/deceased record.

## **BR-10**

Public users should only see information marked as public.

## **BR-11**

A deceased record should not become publicly visible until it has been approved.

## **BR-12**

A financial expense should not be treated as finalized until the required approval is completed.

---

# 51. End-to-End Deceased Registration Workflow

# 52. End-to-End Donation Workflow

## 53. End-to-End Memory Workflow

## 54. End-to-End Grave QR Workflow

## 55. Future Features

The architecture should leave room for:

### **AI-assisted Memorial Creation**

AI could help authorized family members organize submitted information into:

- Biography
- Timeline
- Life summary
- Lessons learned

The final content should remain subject to human review.

### **Voice Input**

Users could say:

"Write a memory about my father."

The application could convert speech to text.

### **Digital Graveyard Map**

GPS-based grave navigation.

### **NFC Grave Tag**

Instead of only QR:

QR + NFC

could open the memorial.

## Online Donation Gateway

Integration with:

- Bank
- MFS
- Payment gateway

## Memorial Timeline

1948 — Birth  
1955 — School  
1970 — University  
1975 — Career  
1980 — Marriage  
...  
2026 — Death

## Family Portal

Family members can collaboratively maintain a person's memorial.

---

# 56. MVP Recommendation

Do not build everything in the first release.

## Phase 1 — Core Graveyard

Build first:

1. User Management
2. Roles & Permissions
3. Graveyard
4. Section/Block/Row
5. Grave
6. Deceased Person

7. Burial
8. Search
9. Dashboard
10. Basic reports

## **Phase 2 — Memorial**

Then:

11. Memorial Profile
12. Family
13. Life Story
14. Life Lessons
15. Memories
16. Tributes
17. Photos
18. Documents
19. QR Code

## **Phase 3 — Finance**

Then:

20. Donors
21. Donations
22. Funds
23. Income
24. Expenses
25. Vouchers
26. Financial reports

## **Phase 4 — Community**

Then:

27. Notices
28. Events
29. Feedback
30. Notifications
31. Mobile application

## **Phase 5 — Advanced**

Finally:

- 32. Digital grave map
  - 33. GPS navigation
  - 34. Online payment
  - 35. AI-assisted memorial
  - 36. Voice input
  - 37. NFC
  - 38. Multi-graveyard support
- 

## 57. Product Vision

The ultimate system should not be merely a database of graves.

It should become a **digital archive of people and their lives**.

The physical grave represents where a person rests.

The digital memorial represents:

Who they were

+

How they lived

+

What they achieved

+

Whom they loved

+

What others remember

+

What we learned

+

What future generations can learn

Therefore, the system has two permanent records:

### Physical Record

**Grave → Burial → Location**

and

## Human Record

**Person → Life → Memories → Lessons**

Together these form the complete Digital Memorial.

---

## 58. Proposed Product Name

Working name:

**Digital Graveyard & Memorial Management System (DGMMS)**

Alternative product-oriented names:

- Digital Memorial
- My Memorial
- Eternal Memory
- স্মৃতির আঙিনা
- স্মৃতি
- Eternal Rest
- Digital Graveyard
- Memorial Archive

The final product name can be decided separately.

---

## 59. Final Functional Modules

The complete system therefore consists of:

| # | Module               | Priority |
|---|----------------------|----------|
| 1 | User Management      | Must     |
| 2 | Role & Permission    | Must     |
| 3 | Graveyard Management | Must     |
| 4 | Section/Block/Row    | Must     |

|    |                        |        |
|----|------------------------|--------|
| 5  | Grave Management       | Must   |
| 6  | Deceased Registration  | Must   |
| 7  | Burial Management      | Must   |
| 8  | Memorial Profile       | Must   |
| 9  | Family Management      | High   |
| 10 | Life Story             | High   |

## 60. Conclusion

The proposed platform should be designed as a combination of:

**Graveyard Administration + Burial Registry + Financial Management + Digital Memorial + Community Platform.**

The most important architectural principle is to keep the **official graveyard record** separate from **community-generated memorial content**, while connecting both through the deceased person's unique identity.

This will make the system useful not only for today's committee members but also as a long-term digital archive for future generations.
